### DETAILED ACTION

1. The term "hydroxyl acid" in present claim 1 is interpreted by the Examiner to mean an acid that has -OH groups in addition to the -OH group in the acid itself.

#### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear as to what applicants mean by the present limitation of claim 1, "the *hydroxyl moiety* is bound to the main chain moiety *via only one carbon* in the carbon skeleton of the hydroxyl acid". For example, it is not clear to the Examiner how the polymerizable units of formulas (1)-(3) (shown in claims 4-6) can meet the present limitation of claim 1, "the hydroxyl moiety is bound to the main chain moiety *via only one carbon* in the carbon skeleton of the hydroxyl acid". Doesn't the phrase within those quotation marks mean that there is *only one carbon link* between the -OH moiety and the main chain moiety? For example, present formula (1), except for the case in which A represents an alkyl group of 1 carbon atom, does not seem to be able to meet the present claim language "the hydroxyl moiety is bound to the main chain moiety *via only one carbon* in the carbon skeleton of the hydroxyl acid". Did applicants mean to say that both -COOH group and -OH group in the hydroxyl acid moiety are bound to the

main chain moiety through the same carbon atom (i.e., the carbon atom from which both of -COOH and -OH stems)?

Appropriate correction or clarification is required.
